

Review

Keeps the old pieces going. Choose the books, and Review hands you a few pieces each day, so everything comes round without you keeping track.

A guide for parents · updated 27 September 2026

Getting started

ONCE PER DEVICE

1. Go to **suzuki-review.netlify.app**
2. Set up your plan (five steps, below)
3. Tap **START**

Add it to your home screen so it opens like a normal app — *Share* → *Add to Home Screen* on iPhone or iPad, *menu* → *Add to Home screen* on Android. Your plan is saved on that phone, and a home-screen app keeps it safe.

Setting up your plan

FIVE STEPS

1 • Which books?

Tick the books to review. For the book your child is in now, choose how far they've got under *up to*.

2 • Twinkles a day

2, 4, 6 or all 8 a day. Always hands separately, always first.

3 • Which days?

Tick the days you practise.

4 • How much?

Pieces a day, minutes a day, or times a week for each piece. The box underneath says what that works out as.

5 • Reminders & sharing

A calendar reminder, and sharing the plan with another phone.

Each day

THE MAIN THING

Tap **START**. One piece at a time, Twinkles first, the rest in a mixed order. When it's played, tap the face that shows how it went — sad, straight or smiley — and the next one appears.

- + **Tapped the wrong face?** Tap Undo.
- + **Stopped part way?** The button says how many pieces and minutes are left.

+ **Coming back later?** Each day keeps its pieces.

Your last 7 days

HOW IT'S GOING

Under the week's plan, a card shows how each piece went, trickiest first. At the start of each week, the two trickiest from the week before become **focus pieces** and come up every day, straight after the Twinkles.

Reminders & questions

WORTH KNOWING

Add to calendar puts a repeating reminder in your phone's calendar at your chosen time. On Android it opens Google Calendar with it filled in — just tap Save. *More options* has a different weekend time and an early warning.

We've changed the reminder time.

Delete the old reminder in your calendar, then add it again.

We have two devices.

Each keeps its own plan. **Share settings** sends it to the other.

We want to change something.

Tap **Change plan** at the top.

Review works best little and often. A few old pieces every day keeps them growing — they're where the skills live.
